

A SAMPLE SYLLABUS

WEBMASTER

One way to make your syllabus, or almost any other document, available on the web is to post a pdf version of the file—just like the one are looking at. This document has been prepared using a text editor to create a \LaTeX source file, and then converted into the PDF format using the `pdflatex` utility, which is available on the departmental Sun computers.

When posting files through your home web page, remember to put them into your `public_html` directory, make them readable by everyone, and give correct URLs (e.g. `/~your_login_name/syllabus.pdf`).
