

**SUBCONVEXITY FOR TWISTED L -FUNCTIONS ON
 $\mathbf{GL}(3) \times \mathbf{GL}(2)$ AND $\mathbf{GL}(3)$**

SOUMENDRA GANGULY

ABSTRACT. In 2012, Valentin Blomer showed q -aspect subconvexity bounds for quadratic Dirichlet character twists of degree 6 and degree 3 L -functions for q prime. In this talk, we discuss a generalization of this to cube-free q and non-quadratic twists.
