$_4F_3$-GAUSSIAN HYPERGEOMETRIC SERIES AND TRACES OF THE FROBENIUS ENDOMORPHISMS FOR ELLIPTIC CURVES

MOHIT TRIPATHI

ABSTRACT. In this talk, I will discuss the summation formula satisfied by the $_4F_3$-Gaussian hypergeometric series. As an application, I will express the special values of $_4F_3$-Gaussian hypergeometric series in terms of traces of the Frobenius endomorphisms of certain families of elliptic curves.
